Thin Client Workstations

Information Technologies has completed phase one of a multi-year deployment of thin client workstations, to date over 100 thin client workstations have been deployed. The workstations have been deployed in Finance, Human Resources and Planning with future installations to be performed in Code Enforcement, Housing, Recreation and the City Manager's office. Thin client computers use thirty-three percent less electricity, cost fifth percent less (\$600 versus \$1,200), have a useful life of five plus years and cost significantly less to maintain and service when compared to a standard personal computer (PC). Information Technologies plans to continue to reduce the number of PCs over the next two fiscal years as part of our ongoing effort to reduce costs and improve service delivery.

Dr. Martin Luther King, Jr Scholarship Program

Application forms for the 2009 City of Oceanside – Martin Luther King, Jr. Scholarship Program are now available at area high schools, the Oceanside Public Library and community resource centers.
